Supplement to the
"Proceedings of the Indian Academy of Sciences"

INDEX TO VOL. XLIV—(A)

AUTHORS' INDEX

Acharya, Y. V. G. .. Spectrum of axi-symmetric turbulence in a contracting stream, 63.

Agarwal, S. K. D. .. *See* Ramaiah and Agarwal.

Ahluwalia, V. K. and Seshadri, T. R. Nuclear oxidation in flavones and related compounds, L, 1.

Aravamudan, G. .. Studies in phase rule, Part I, 375.

Athavale, V. T. .. *See* Varde and Athavale.

.. *See* Venkateswarlu and others.

Bannerjee, N. R. and Seshadri, T. R. Isolation and constitution of patulitrin, 284.

Bass, L. .. On the stochastic equation for the energy loss of fast electrons in matter, 423.

Chandra, Girish .. Studies with Scintillation coincidence spectrometer: Cs^{134}, 194.

Chandrasekharan, K. S. Perfect polarisation of X-rays by crystal reflection, 387.

Das, M. Sankar .. *See* Venkateswarlu and others.

Deware, H. G. .. *See* Nainan and others.

Govindan, T. K. .. Heterocyclic compounds, VII, VIII, 123, 126.

Gupta, S. L. .. *See* Ramaiah and others.

Gupta, V. N. and Seshadri, T. R. Synthesis of angolensin, 223.

Jaseja, T. S. .. *See* Venkateswarlu, Putcha and Jaseja.

Kagal, S. A., Karmarkar, S. S. and Venkataraman, K. Synthetical experiments in the chromone group, XXXII, 36.

Karmarkar, S. S. .. *See* Kagal and others.

Kharkar, D. P. and Patel, C. C. Peroxy titanium oxalate, 287.

Khubchandani, P. G. .. *See* Shankar and Khubchandani.

Krishnan, R. S. and Sivarajan, S. R. — Scattering of polarised light by colloids containing anisotropic particles, 274.

Krishnan, T. S. .. — Raman spectrum of strontianite ($SrCO_3$), 96.

Krishnaswamy, R. .. — *See* Umamaheswararao and Krishnaswamy.

Mehta, D. J. .. — *See* Mehta and Mehta.

Mehta, S. M. and Mehta, D. J. — Use of sodium perborate in the preparation of sodium chlorite, 392.

Mukerji, Ambuj .. — *See* Nainan and others.

Nagarathnamma, (Miss) — Umbilical indicatrices of the unit tangent vector and the principal normal and binormal vectors of a curve in Riemannian space, 351.

Nainan, T. D., Deware, H. G. and Mukerji, Ambuj — Design and performance of a thin magnetic lens β-spectrometer, 111.

Neelakantan, S., Seshadri, T. R. and Subramanian, Sankara — Chemical investigation of Indian lichens, XX, 42.

Padmanabhan, V. S. .. — The role of solvents in chemical reactions, Part III, 1.

Pancharatnam, S. .. — Generalized theory of interference, and its applications, I, II, 247, 398.

Patel, C. C. .. — *See* Kharkar and Patel.

Phariseau, P. .. — On the diffraction of light by progressive supersonic waves. Oblique incidence: Intensities in the neighbourhood of the Bragg angle, 165.

Rajagopalan, T. R. and Seshadri, T. R. — Synthesis of citreorosein and Alœ-emodin, 418.

Ramaiah, N. A. and Agarwal, S. K. D. — Comparative studies of alternating and direct current Polarography. Effect of concentration, 26.

.. — Comparative studies of alternating and direct current polarography. Effect of pH, 83.

.. — Polarographic investigation of Cadmium ferrocyanide complex, 134.

Ramaiah, N. A. and Raman, V. Sundara — Spectrophotometric determination of the dissociation constants of 4-(*p*-nitrophenyl-azo)-8-hydroxy quinoline, 90.

Ramaiah, N. A., Gupta, S. L. and Vishnu — Studies on the kinetics of the salt effects on the decomposition of murexide in acid solutions, 46.

Ramakrishnan, Alladi .. A physical approach to stochastic processes, 428.

Ramakrishnan, Alladi and Srinivasan, S. K. A new approach to the cascade theory, 263.

Ramanathan, Krishna A study of the solar daily variation of meson intensity at Ahmedabad ($\lambda = 13°$ N.) using a cubical meson telescope, 307.

Raman, C. V. .. The diamond, 99.

.. The specific heats of crystals, I, II, III, 153, 160, 367.

.. Quantum theory and crystal physics, 361.

Raman, P. S. .. Oxidations with silver iodide dibenzoate, 321.

Ramanujan, M. S. .. Existence and classification of products of summability matrices, 171.

Raman, V. Sundara .. *See* Ramaiah and Raman.

Ramaseshan, S. and Sivaramakrishnan, V. Faraday rotation in calcite, 201.

Ram Behari .. *See* Singal and Ram Behari.

Rangaswami, S. and Sastry, B. V. Rama Constitution of maxima substance A, 279.

Rao, N. V. Subba and Ratnam, C. V. Studies in the formation of heterocyclic rings containing nitrogen, II, 331.

Rao, S. K. Lakshmana Harmonic analysis of the spatial flow of an incompressible viscous fluid, 6.

Ratnam, C. V. .. *See* Rao and Ratnam.

Sastry, B. V. Rama .. *See* Rangaswami and Sastry.

Seshadri, T. R. .. *See* Ahluwalia and Seshadri.

.. *See* Neelakantan and others.

.. *See* Gupta and Seshadri.

See Bannerjee and Seshadri.

.. *See* Rajagopalan and Seshadri.

Shankar, Jagdish and Khubchandani, P. G. An X-ray study of natural monazite, II, 130.

Singal, M. K. and Ram Behari Characteristic lines of a hypersurface V_n imbedded in a Reimannian V_{n+1}, 53.

Sivarajan, S. R. .. *See* Krishnan and Sivarajan.

Sivaramakrishnan, V. ..	*See* Ramaseshan and Sivaramakrishnan.
..	Dispersion of Faraday rotation in fused quartz, 206.
..	Magneto-optic studies in the nitrates of lead, barium and strontium, 216.
Srinivasan, S. K. ..	*See* Ramakrishnan and Srinivasan.
Sriramadas, A. ..	Pyroxenes from the charnockite khondalite interaction zone of Waltair, 338.
Subramanian, Sankara..	*See* Neelakantan and others.
Sundaram, A. K., Sundaresan, M. and Vartak, D. G.	A study of thallous-thiocyanate system, 139.
Sundaramma (Miss), K.	Comparison and evaluation of the absolute values of paramagnetic resonance absorption in some powders, 345.
Sundaresan, M. ..	*See* Sundaram and others.
Umamaheswararao and Krishnaswamy, R.	Determination of uranium content in radiaoctive minerals by autoradiography, 144.
Varde, M. S. and Athavale, V. T.	Studies of gallic acid complexes with metals and their analytical applications, II, 228.
Vartak, D. G. ..	*See* Sundaram and others.
Venkataraman, K. ..	*See* Kagal and others.
Venkateswarlu, Ch., Das, M. Sankar and and Athavale, V. T.	Studies of gallic acid complexes with metals and their analytical applications, III, 241.
Venkateswarlu, Putcha Jaseja, T. S.	The ionic character of singly bonded molecules, 72.
Verma, P. D. S. ..	Hypo-elastic pure flexure, 185.
Vishnu ..	*See* Ramaiah and others.

TITLE INDEX

Angolensin, synthesis (Gupta and Seshadri), 223.

Axi-symmetric turbulence in a contracting stream, spectrum (Acharya), 63.

β-Ray spectrometer, thin magnetic lens, design and performance of (Nainan and and others), 111.

Cascade theory, a new approach (Ramakrishnan and Srinivasan), 263.

Characteristic lines of a hypersurface V_n imbedded in a Riemannian V_{n+1} (Singal and Ram Behari), 53.

Chemical reactions, the role of solvents, III (Padmanabhan), 15.

Chromone group, synthetical experiments, XXXII (Kagal and others), 36.

Citreorosein and Alœ-emodin synthesis (Rajagopal and Seshadri), 418.

Diamond (Raman), 99.

Diffraction of light by progressive supersonic waves. Oblique incidence: Intensities in the neighbourhood of the Bragg angle (Phariseau), 165.

Faraday rotation in calcite (Ramaseshan and Sivaramakrishnan), 201.

Faraday rotation in fused quartz, dispersion (Sivaramakrishnan), 206.

Gallic acid complexes with metals and their analytical applications, studies, II (Varde and Athavale), 228; III (Venkateswarlu and others), 241.

Harmonic analysis of the spatial flow of an incompressible viscous fluid (Rao), 6.

Heterocyclic compounds, VII, VIII (Govindan), 123, 126.

Heterocyclic rings containing nitrogen, studies in the formation, Part II (Rao and Ratnam), 331.

Hypo-elastic pure flexure (Verma), 185.

Interference, generalized theory, and its applications, I, II (Pancharatnam), 247, 398.

Ionic character of singly bonded molecules (Venkateswarlu and Jaseja), 72.

Lichens, Indian, chemical investigation, XX (Neelakantan and others), 42.

Magneto-optic studies in the nitrates of lead, barium and strontium (Sivaramakrishnan), 216.

Maxima substance A, constitution (Rangaswamy and Sastry), 279.

Meson intensity at Ahmedabad ($\lambda = 13°$ N.), a study of the solar daily variation, using a cubical meson telescope (Ramanathan), 307.

Monazite, natural, an X-ray study, II (Shankar and Khubchandani), 130.

Murexide, decomposition, in acid solutions, salt effects, studies on the kinetics of (Ramaiah and others), 46.

Nuclear oxidation in flavones and related compounds, L (Ahluwalia and Seshadri), 1.

Paramagnetic resonance absorption in some powders, absolute values, comparison and evaluation of (Sundaramma), 345.

Patulitrin, isolation and constitution (Bannerjee and Seshadri), 284.

Peroxy titanium oxalate (Kharkar and Patel), 287.

Phase rule, studies, Part I (Aravamudan), 375.

Polarisation, perfect, of X-rays by crystal reflection (Chandrasekharan), 387.

Polarographic investigation of cadmium ferrocyanide complex (Ramaiah and Agarwal), 134.

Polarography, alternating and direct current, comparative studies (Ramaiah and Agarwal), 26, 83.

Products of summability matrices, existence and classification (Ramanujan), 171.

Pyroxenes from the charnockite khondalite interaction zone of Waltair (Sriramadas), 338.

Quantum theory and crystal physics (Raman), 361.

Radioactive minerals, determination of uranium content, by autoradiography (Umamaheswararao and Krishnaswamy), 144.

Raman spectrum of strontianite ($SrCO_3$) (Krishnan), 96.

Scattering of polarised light by colloids containing anisotropic particles (Krishnan and Sivarajan), 274.

Scintillation coincidence spectrometer: Cs^{134} (Chandra), 194.

Silver iodide dibenzoate, oxidations with (Raman), 321.

Sodium perborate, use, in the preparation of sodium chlorite (Mehta and Mehta), 392.

Specific heats of crystals, I, II, III (Raman), 153, 160, 367.

Spectrophotometric determination of the dissociation constants of 4-(*p*-nitrophenyl-azo)-8-hydroxy quinoline (Ramaiah and Raman), 90.

Stochastic equation for the energy loss of fast electrons in matter (Bass), 423.

Stochastic processes, a physical approach (Ramakrishnan), 428.

Thallous-thiocyanate system, a study (Sundaram and others), 139.

Umbilical indicatrices of the unit tangent vector and the principal normal and binormal vectors of a curve in Riemannian space (Nagarathnamma), 351.
